

Welcome to Face2Face

Welcome to our latest edition of the Interface newsletter, Face2Face.

With Edinburgh in full party mode with the Edinburgh Festivals underway, Interface also has its own reason to celebrate – our 5th birthday (AY 2009/2010) and the close of our busiest year yet with over 200 enquiries currently in active discussions with an academic institution. July itself brought the highest number of active projects underway in any one month since Interface began.

Our challenge is now to see if we can exceed this, and there has never been a better time to try as we now have over 50 different types of project outcomes from short student

you would like to find out if any of these projects types could benefit your business, we would be delighted to speak with you!

Year 6 also brings the next round of the Scottish Funding Council Innovation Vouchers, click [here](#) to find out more.

As many of you will know, our Evaluation is now underway, and we would like to thank those of you that have been interviewed for your time and your comments - your feedback is very much appreciated.

Finally, Interface has commissioned a supplement in Business Insider which will appear in the September Edition. If you don't receive a copy, please e-mail us and we can drop one in the post to you.

Kind Regards

Laura Noble
